FIBERGLASS ABOVE GROUND TANKS

APPLICATIONS

- Wastewater Treatment Systems
- pH Balance Systems
- Chemical Storage
- Fire Suppression
- Rainwater Collection
- Product Storage

OPTIONS

- Manways & Fittings
- Baffles
- Mixer Mounts
- Heaters & Insulation
- Ladders & Rails
- Sight Tubes & Level Indicators

MARKETS

- Municipal
- Industrial
- Commercial
- OEM Manufacturing

Fiberglass composites are the industry standard for storage of corrosive materials. FTS builds a full family of above ground tanks for chemical storage, waste process, fire protection, rainwater collection, and many other tank use applications. Custom options such as mixers, interior aeration grids, pipe systems, are all scopes of work we can incorporate into a custom fiberglass above ground tank.
