Name: 84 Lumber - Greenly

Location: Greeley, CO

Application: Fire Suppression Systems

Product: Fire Water Storage Tank

Size: (2) 8' x 17,000 Gallon Tanks. 8' Dia x 46.75' Long & 5' Riser w/ 24" Access Opening

These two Fiberglass Tank Solutions fire water tanks service an 84 Lumber yard in Greeley, CO. Manifolled together, they provide increased storage capacity and higher flow rates, tying into existing system, and meeting the expanded fire suppression needs of the site. Matching NPFA 22 Standards. Their lightweight design facilitated easy logistics to the job site, enabling the use of an excavator instead of a crane for installation. With an additional 34,000 gallons of on-site water storage, their facility can handle fire emergencies. Having the fastest lead times in the industry, it allowed us to meet this Customers immediate construction schedule needs.

Why work with us?

- ✓ Turnkey Prepackaged Systems
- ✓ Reduced Construction Costs
- ✓ Superior Quality
